

Labyrinth Learning Instructor Support Materials

Every Labyrinth textbook is supported by an extensive portfolio of resources that reduce prep time, simplify assessment, and accelerate learning.

Background Knowledge Survey

Gauge your students' skill levels before the course begins. This useful survey assesses student knowledge of all of the learning objectives for the course.

Course Preparation Document

Fast-track your familiarity with the course with an overview of the book, the support materials, the types of exercises, lab setup information, and more. Time tables for individual chapters, entire units, and the complete book are included.

Customizable Sample Syllabus

This customizable Microsoft Word document enables you to create your own custom syllabus without starting from scratch.

Lecture Notes and Tools

A chapter overview, discussion points and activities, and a timing table are provided for each chapter. A separate PDF file of the table of contents from your book is also included.

Customizable PowerPoint Presentations

Supplement your lecture and discussion with visual aids. These well-designed presentations help reinforce key points. Students can access and review the presentations online.

Printable Solutions Guide

This easy-to-use solution guide includes screen shots for quick comparison with student work.

Online Concepts Review Quiz with Complete Answer Key

Students can access and complete Concept Review quizzes online that provide automated, immediate feedback. An answer key contains answers to all questions in the Concepts Review sections, including references to the textbook page containing the answer.

Text Banks with Answer Keys

Our test banks include chapter and unit tests. True/false, multiple choice, matching, and sequence questions may be included, depending on the title.

Customizable Assessments

Additional exercises to use as homework or assessment are available for every chapter. They're Word based, which means you can customize them as you choose. Many titles are also associated with comprehensive unit- or book-level projects.

Downloadable Student Exercise Files

Students may need files to complete certain exercises. These starting-point files, templates, forms, and other materials can be accessed online by students (and are included in the instructor downloads as well).

Exercise Solutions

We provide discrete solution files for exercises that instructors can use for grading. Certain titles also include rubrics for more complex exercises or those that will result in varied responses.

Multimedia Support

Certain titles include multimedia components that help students learn to use certain features. Our unique WebSims offer hands-on experience for exercises that cannot be accessed or modified in the computer lab. Also, when appropriate, videos are provided that reinforce what is being taught in the chapter.

Printable Solutions Guide

“This ISM is a great resource. From PowerPoint Slides, to lesson solutions; it is packed with everything an instructor needs to conduct a class. All of that, and it's complimentary! You just can't beat that.”

- Instructor, Leeward Community College

Fresh thinking backed by more than 25 years of helping educators teach and students learn

Since 1990 Labyrinth Learning has been working closely with educators like you to develop easy-to-use solutions that empower educators to teach complex subjects quickly and effectively—and enable students to gain confidence, develop practical skills, and compete in a demanding job market. Now we are building on that expertise with improved textbooks and electronic solutions that go far beyond books to meet the needs of today's educators and students.

Unwavering commitment to high-quality products and responsive customer service

Our goal is to make sure that you have the most user-friendly and error-free texts and solutions that we can deliver. Our commitment to quality includes using final software releases for screenshots to ensure accuracy and avoid confusion for students and educators. And our convenient customer service offers fast, responsive help online and by phone.

Approved Certification Courseware

Some of our titles are certified by ProCert as approved exam-ready courseware for certification programs.

eLab Online Assessment and Learning

Engage students with multiple learning resources to meet the needs of every learning style. eLab automates the process of evaluating student work. Students demonstrate skills in a highly realistic, simulated environment.
